

WAI YAN KYAW

Front-End Web Developer

PROFILE

I am a passionate Front-End Web Developer with experience in building responsive, interactive, and visually appealing web applications. I have strong skills in HTML, CSS, JavaScript, and React.js, which I use to bring ideas to life through clean and functional code. My focus is on creating user-friendly features and interfaces that work across different devices. Coding challenges are something I enjoy, and I am always looking to improve my skills in modern web technologies. I am excited to bring my attention to detail and creativity to a new position, where I can continue growing as a Front-End Web Developer and contribute meaningfully to a reputable company.

EXPERIENCE

Front-End Web Developer | Ramada By Wyndham Downtown Dubai January 2024 to Present

- Built and maintained web pages for Ramada’s booking and information site using HTML, CSS, JavaScript, and React.js for use on different browsers and devices.
- Developed mobile-friendly layouts for booking forms and service request pages with Bootstrap and Tailwind CSS to support both mobile and desktop use.
- Used PHP Laravel to create features like real-time room availability, booking confirmations, and service requests that improved the guest experience.
- Converted Ramada’s design assets into working web pages that followed the brand’s style guides and maintained a consistent look.
- Tested and fixed issues with the site’s booking engine and other features, improving loading times and user experience.
- Managed code updates with Git and GitHub to keep projects organized and make it easier for the team to collaborate.
- Worked with back-end developers to set up APIs, allowing data to flow from Ramada’s reservation systems to the website and display accurate room availability.

Intern | Technoland MM | January 2022 to July 2023

- Helped create front-end components for client websites with HTML, CSS, and JavaScript.
- Gained experience with PHP Laravel to make small updates to front-end code for projects.
- Built responsive layouts for e-commerce and corporate pages.
- Tested web pages to find bugs and reported issues to senior developers.
- Participated in code reviews and learned from feedback on my work.
- Participated in project meetings to understand client needs.
